Visitor & Workforce Management. Simplified.

“

"Accushield has evolved from a nice to have check-in tool to the virtual centerpoint of our daily operation. As regulators have had to evolve how they evaluate operator protocols, they often compliment us on how we have incorporated the Accushield solution into our overall methodology in tracking and managing visitors, third-party care, and staff. Like many technology advances, this has become a regular and reliable part of our everyday best practices."

”

- David Eskenazy, CEO - Cogir Management, U.S.A.

Visitor + Entry Management

FACT: Safety and security remain the #1 reason residents move into long-term care.

Accushield's Entry Management solution was designed by Executive Directors to help Senior Living Communities, Nursing Homes, Hospitals, and Healthcare Facilities know who is in their buildings, enabling the creation of a safer and more secure environment. Accushield's tablet-based kiosk replaces the manual paper logbooks with a streamlined sign-in and identification process for all visitors, staff, third-party caregivers, and residents who enter and exit the building.

Visitor, Staff and Resident Sign-in

Digitize the process of recording, verifying, and logging visitor and staff entry/exit information.

Document Verification at Sign-in

Healthcare compliance at its best with easy collection and verification of medical or any other documentation required for sign-in.

Health Screening Questionnaire (optional)

- Customize any number of screening questions required during sign-in and/or sign-out (including the ability to ask follow-up questions based on answers)
- Tailor screening questions to role type (staff member, family/guest, service provider, volunteer, resident)
- Receive text/email alerts if a person fails the screening questionnaire

Integrated Touchless Thermometer (optional)

- Optional touchless temperature capture during sign-in with a medical-grade thermometer
- Receive text/email alerts if a person measures a temperature above the set threshold

Photo Capture at Sign-in

Make security and safety easier and provide peace of mind to residents and staff by providing a visible name badge to confirm sign-in and health screening compliance.

Visitor + Entry Management (cont.)

Contactless Mobile Sign-in with QR Code

Sign in to the community via mobile app QR code without having to touch the kiosk screen.

ADA Compliance - Senior Friendly Screen Size

The Accushield kiosk was designed to meet and surpass requirements mandated by governing agencies with our screen size surpasses certain ADA US 508 & WCAG compliance requirements.

Capture Waiver and Informed Consent

Add custom waiver, informed consent, or policy forms (specified by role type) that must be accepted to complete the sign-in process and receive a name badge.

Reporting + Dashboard

The Accushield Dashboard is the nucleus of front desk operations in your community. It is equipped with robust features that allow you to swiftly access reports, data, documents, analytics, and all the information you need to manage visitor entry, security, and compliance. From sign-ins to document verification, the Accushield Dashboard streamlines operations for front desk efficiency.

Visitor, Staff and Resident Sign-in Reports

Instantly access visitor, staff, caregiver, and resident reports from your smartphone, computer, or kiosk.

Respirator Fit Testing

Our solution is designed to simplify the Occupational Safety and Health Administration (OSHA) mandatory fit test guidelines and help you avoid one of the top 10 most-cited deficiencies in the healthcare industry.

- Capture medical evaluations and signatures
- Record both failed and passed fit test evaluations
- Receive sign-in alerts if a staff member signs in with a missing or outdated test
- Set due dates for the next fit test for each staff member

Advanced Reports in Real-time

View sign-ins with real-time activity feed of who is in your building.

Corporate + Enterprise Reporting

Our Corporate Dashboard provides oversight and control of all communities within your portfolio.

- High-level insights can be viewed at the corporate or community level
- Corporate-level visitor and staff logs that can be filtered by community
- Agency Staffing Insights to review agency usage across the enterprise or at the community level

Reporting + Dashboard (cont.)

Custom Contact Tracing Reports

Identifying the point of exposure is critical to preventing avoidable future exposure. Our reports enable you to:

- Access details by date, visitor type, and more
- Pinpoint individuals exhibiting symptoms during a certain timeframe
- Identify what the individual was doing while in your community
- Evaluate the residents visited in order to implement necessary precautions

Agency Staffing Hourly/Daily Log Reports

Track the number of hours contracted with the community as staff agency workers sign in to fill a shift, while also comparing staff agency clock-in/out logs vs. contracted hours to audit staffing invoices and budget staffing costs.

Secure Data Collection (HIPAA Compliant)

Data stored in a private HIPAA-compliant cloud (we understand healthcare privacy).

Advanced Reports in Real-time

View sign-ins with a real-time activity feed of who is in your building.

Care Coordination

The Accushield solution was built by operators, for operators, which means we strive to offer solutions that will positively impact all of your operations, including specialized care reports along with community care-enhancing surveys and opportunities for you to strengthen your reputation, all while doing what you do best: providing the highest quality care to your residents.

Accushield Love Meter™

Keep an up-to-date check on the least visited residents in the community who may be at a risk of experiencing isolation and depression.

Event Management

- Custom event sign-in to capture what event visitors are attending (i.e., community tour)
- Sign groups in via the Dashboard prior to the event
- Notify staff via text message or email as event attendees sign in
- Export and download event attendee lists

Volunteer Management

- Sign in volunteer groups via the Dashboard
- Volunteer analytics and reporting
- Group tracking and reporting
- Document storage
- Multi-site capabilities

Group Messaging

Communication is key! With Accushield, communities have the ability to send a mass message in the event of an emergency to family members, visitors, third-party caregivers, and/or residents. Additionally, communities can select all people in the building during a specific timeframe to send a message to (i.e., contact tracing), and can communicate directly with any or all residents and staff with just a few simple clicks (i.e., holiday celebration, staff meetings, etc.)

Resident Care Dashboard

In-depth care report analyzes third-party caregiver data to help operators understand the care provided by home health, hospice, self-employed private care, etc.

Safety + Security

FACT: Safety and security remain the #1 reason residents move into long-term care.

The Accushield solution began from a desire to keep residents and staff safe by knowing who is in the building at all times. Designed by operators, for operators, our solution continues to provide robust safety and security measures, trusted by over 6,900 communities across the country.

Community Watchlist

Knowing who is in your building is important; however, knowing who is not in your building can be equally important. With the Community Watchlist, get notified immediately if someone tries to enter your building who is not permitted to be in the building.

Evacuation Management

In the event of an emergency, time matters. When it's time to evacuate, use the Evacuation Report to quickly and easily identify every individual in your community and manage the evacuation.

- Instantly print a list of all visitors, staff, third-party caregivers, vendors, and residents currently in the community.
- Access evacuation reports from your computer, smartphone, tablet, or print directly from the kiosk badge printer.
- See everyone who is in your building from your smartphone.
- Send mass text messages to all visitors, residents, and staff in the community.
- Instantly call a visitor, staff member, or resident in the community who is unaccounted for.

Verified Visitor Badge

Increase security and add professionalism with our verified visitor badge, allowing staff and residents to know who within the community is a visitor and showing that they have successfully completed all community-specific sign-in requirements.

Document Verification

Approve required documentation and licenses instantly at sign-in for increased security.

Safety and Security (cont.)

Alerts/Notifications

Instantly receive alerts when someone trying to enter your community does not pass your requirements.

Group Messaging

Communicate quickly and effectively with staff, visitors, vendors, third-party caregivers, and residents in the event of an emergency.

Contact Tracing

The health and wellbeing of your residents and employees is critical. With our contact tracing capabilities, you can pinpoint exposure source and prevent avoidable future exposure.

Health Screening

Our solution offers you the option to include customizable health screening questions at sign-in to prevent possible exposure to various illnesses, protecting your vulnerable residents from infection.

Scheduling

Designed for healthcare, built by frontline workers. Stop paying for over-engineered workforce solutions and start winning back your employees. Our solution offers a simple, mobile-first platform that empowers your team to browse, self-schedule, and accept shifts directly from their phone. Eliminate the costly administrative burden of filling schedules, while controlling overspend on staff agencies, with Accushield Flex™.

Agency Staffing Hourly/Daily Log Reports

Track the number of hours contracted with the community as staff agency workers sign in to fill a shift, while also comparing staff agency clock-in/out logs vs. contracted hours to audit staffing invoices and budget staffing costs.

With Flex you can:

Automate Callouts: Reach staff instantly by sending shift callouts in real-time. Organize and match shifts according to seniority, role, or location.

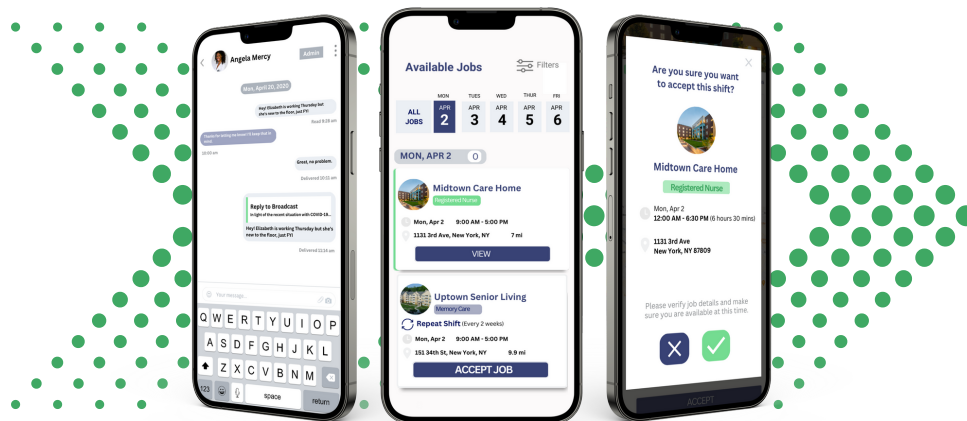

Optimize Scheduling Quickly: Build, manage, and access schedules on a single platform.

Empower Staff with Freedom and Flexibility: Give your staff control over their schedules from their phones to boost shift fulfillment, morale, and retention.

Access Qualified On-Demand Staff: Fill shifts with instant access to 20,000+ vetted healthcare professionals in our CareNetwork.

Keep Your Staff Informed: Share updates and communicate instantly with your whole staff. Use 2-way messaging to stay connected with groups and individuals.

Import/Export Data to Other Systems: Save administrative time with payroll and other integrations. Export and import data to other enterprise software systems.

Reputation Management

The Accushield kiosk can be configured to prompt all visitors to leave a Google review or take a custom survey upon their exit, which helps enhance a community's online reputation and ultimately drives more organic leads. Additionally, operators can survey employees which increases operational efficiencies and employee engagement, which ultimately leads to reduced turnover and better quality of care for your residents.

Reputation Accelerator™

Automate your Google review outreach and capture customer experience feedback in real-time.

- 74% of our customers' Google reviews come from Reputation Accelerator, with an average rating of 4.6
- Configure a set of standard categories for the prompted satisfaction survey
- Request Google and social feedback from your visitors, third-party caregivers, vendors, and staff every time they sign out of the kiosk

Employee Feedback Surveys

Companies who conduct regular feedback from employees experience 14.9% lower turnover rates - which not only directly impacts your bottom line, but more importantly, the quality of care your residents receive.

- Quickly and easily create customized staff survey campaigns
- Get alerted when staff have a negative experience
- Optionally, send staff your social media pages to leave reviews and improve your online recruitment opportunities
